

### **The structure of earnings statistics tables (STADAT tables) has been renewed**

In line with the changing user needs, we have updated our static tables published from our monthly institutional labour statistics collection system (including data on the number of employees and earnings). From now on, tables including data on the number of employees, average gross earnings, average gross regular earnings, average net earnings and average earnings by SNA concept will be also published without taking into account the data of fostered workers.

Furthermore, the structure of the published tables has been made more transparent, and in parallel, the publication of some tables, which were less searched for, has been discontinued in such form. Changes **do not involve data loss** for our users, all information is still available in our Dissemination database.

Access to the relating STADAT tables:

[http://www.ksh.hu/stadat\\_infra\\_2\\_1](http://www.ksh.hu/stadat_infra_2_1)

Access to the relating data sets of the Dissemination database:
