

Péter Varga (Bloomberg)

How does a news agency expect statistical institutes to improve their communication of official statistics?

Topic 4 – Getting the statistics out

Keywords:

Introduction

Obstacles and challenges for large data provider, such as Bloomberg, to provide quality data to their users on a timely manner. Relationship with primary sources, best practices, suggestions.

Methods / Problem statement

When people today retrieve information almost instantly from all available channels, there is an increase in pressure from our clients to provide timely statistical data on our terminals. This is more evident with clients who manage large financial assets, where the slightest error or delay could result in heavy losses.

Results / Proposed solution

We need both technical developments and communication with stakeholders to keep up with the challenges in order to improve the timely delivery of the data. We will continue our collaboration of best practices and suggestions for future enhancements.
