If the number of related parties concerning a given type of services exceeds 30, please use more additional pages and sum them up at the end. EBOPS-codes must be indicated on each additional page.

The questionnaire should be filled in by a typewriter, computer or in legible block letters. Please indicate all identification data on all pages and additional pages of the questionnaire.

If your enterprise has no international trade in services activity in the reference period, please **fill in the cover page, indicate the reasons for negative answer**, sign and send back!

II. DETAILED INSTRUCTIONS

a) **Denomination of services**

Please give the right denomination of the type of services according to the list in section IV (Types of Services). For simplifying the fillings and classification, the representative TESZOR '08 codes are shown, also indicated if any data should be recorded differently.

In case of inseparable services the value of the higher one should be reported.

b) **EBOPS-code**

Please give the three-digit EBOPS-code of the type of service listed in section IV.

The EBOPS code system is an expanded classification for Balance of Payments Services transacted between residents and non-residents.

c) **No. of related parties**

Please here specify the number of related countries in a given type of service.

d) **Partner country code**

Here to specify the two-letter ISO-code of the participant country (see: the listing on the back page of the manual)

e) **Partner country denomination**

In case of **insurance services** the report refers to the site of the partner, not to the location of the risk-taking. (**Difference from the Act of Insurance 3. paragraph (1), section 36**)

In case of **bunker fuel** selling -the nationality of the invoicer, in case of purchasing -the place of fueling should be reported.

In **off-site processing** the country where that particular commodity is sold should be as exports. In imports it is the place of processing and/or the country where the necessary primary commodity is purchased from (can be the location of processing or a third party).

Other services: please report the partner country where the service is acquired in exports and the partner providing the service in imports. In case of different types of services all concerned partners should be named. If the service-provision occurred in Hungary, then the nationality of the provider is normative.

Trade in services with EU member countries should also be reported.

In case of **transportation services** please report the nationality of the invoice-payer in exports and that of the invoice-issuer in imports.

In case of **insurance services** the report refers to the partner country, not to the place of risk taking.

f) **Valuation**

The value of the service should be the total sum figuring on the invoice in thousand forints (without decimals) and **without** VAT, MwSt, etc.

If your records are kept in foreign currency, for the conversion to HUF the official exchange rate (issued by the National Bank of Hungary and effective on the day when the service is supplied) should be used.

The day of performance is the day when the service is acquired/supplied (it is usually the date of invoicing). If that is not plausible, please use the NBH average exchange rate for that quarterly reports.

g) **Performing a service**

Delivery date is the term, when the service was provided (usually is the same as the invoice date). In case of persistent performance the date of the invoice of part performance should be taken into account. In case of barter (service-good, service-service) please report the value for which the service would be supplied to third party.

h) **Annual fees**

If a service is invoiced once a year, the fees should be divided for quarters proportionally.

III. DEFINITIONS

Service: The term services covers a heterogeneous range of intangible products and activities that are difficult to encapsulate within a simple definition. Services are also often difficult to separate from goods with which they maybe associated in varying degrees.

Services differ from goods in a number of ways, most commonly in the immediacy of the relationship between supplier and consumer. Many services are non-transportable, i.e., they require the physical proximity of supplier and customer – for example, the provision of a hotel service requires that the hotel is where the customer wishes to stay, a cleaning service for a business must be provided at the site of the business, and a haircut requires that both hairstylist and client be present.

Foreign trade in services is defined as export and import of services between a resident and a non-resident and based on a private contract which represents mutual obligations.

Resident (domestic): Each natural and legal person whose center of economic interest (dwelling, settlement, production etc.) and activity is linked permanently (for more than a year) to Hungary's economic territory. Residents with foreign VAT numbers are obliged to report on ITS statistics as well.

Non-resident (foreign): Each economic organization and natural person who is not considered resident according to the above definition.

Examples:

- Subsidiary/ branch/ site of a resident economic organization registered abroad.
- Foreign corporation without site but with Hungarian tax number (VAT –registration).

Foreign trade transacted with the above mentioned residents should also be reported.

Please report also international trade in services transacted with EU member states.

IV. TYPES OF SERVICES

Resident – domestic enterprise/individual

Non-resident – foreign enterprise/individual (for more details see: definitions)

001 Maintenance and repair services n.i.e.

Included are: TESZOR'15 33.1 Repair and maintenance services; TESZOR'15 45.2 Ordinary maintenance and repair services (except electrical system, tire and body repair services) of cars and light goods motor vehicles; TESZOR'15 95.2 Repair services of household appliances and home and garden equipment.

Repair services is a productive activity which aims at reconstitute the decreased value of an existing product.

Included are: receipts of resident repairing enterprises from non-residents, as well as payments of resident enterprises to non-resident repairing enterprises. This activity comprises primarily repair and maintenance of vessels, planes, machinery and equipment and other means of transportation. Repair can occur either on the site of the service provider or elsewhere.

Excluded are:

- repair services related to construction, or to buildings at railway stations, airports and docks (250, 251 Construction services)
- repair related to computer appliances (263 Computer services)
- cleaning of transport equipment (transport)

002 Off-site processing

A resident enterprise purchases goods and auxiliary materials abroad and have them processed also by non-residents. The semi-finished and ready-made product is sold abroad. Neither the goods purchased, nor the product sold are shipped through Hungarian territory, however remain in the property of the 'off-site processor' enterprise.

The value of sold semi-finished and ready-made products should be reported on *exports*.

The value of purchased goods and services should be reported on *imports*, as well as wages and salaries paid.

If the purchase, processing and sale did not occur in the same statistical reference period, the transaction is only due **when the sale (export) is finished**.

If an exact breakdown on the imports meets difficulties, an estimation by the provider is suggested.

If the off-site processing happens to be **unprofitable** (the value of imports exceed the value of exports), an explanation is needed in the „notes” section of the questionnaire.

Other services related to off-site processing (licenses, transports) should be reported in the corresponding services category.

003 Bunker fuel

Exports: value of fuel purchased from resident Hungarian fuel companies by non-resident enterprises with any means of transport.

Imports: value of fuel of Hungarian resident enterprises with any means of transport that purchase fuel abroad.

Reporting obligations for bunker fuel are shown in parentheses after each means of transport denomination

- *Sea and inland waterway transport:*
 - *Exports:* value of directly served fuel by Hungarian fuel and gas companies to ships and vessels registered abroad (fuel companies).
 - *Imports:* value of fuel purchased by Hungarian ships and vessels abroad (resident shipping enterprises).
- *Air transport:*
 - *Imports:* value of fuel purchased by Hungarian airline companies abroad (airlines).

Exports: value of fuel served by Hungarian fuel companies to non-resident airlines are out of scope as it is observed by the foreign trades and services.

- *Rail transport:*
 - *Exports:* value of gasoline and current purchased in Hungary by non-resident railroad companies (Railroad companies).
 - *Imports:* value of gasoline and current purchased abroad by Hungarian railroad companies (Railroad companies).

Out of scope if the fuel was fueled up at a by-border rail turntable.

- *Road transport:*
 - *Export:* values of fuels tanked by scheduled non-resident buses, coaches, trucks and lorries at Hungarian fuel companies if fuel card was used (fuel companies).
 - *Imports:*
 - value of fuel purchased abroad by Hungarian scheduled buses and coaches, trucks and lorries. **Just in the case when a fuel card was used (issued abroad).** (Scheduled buses, coaches, trucks and lorries)
 - values of fuel purchased abroad by Hungarian scheduled buses and coaches, trucks and lorries and Hungary-issued fuel card was used (for Hungarian fuel companies)

In case of quantity recordings, an estimation is suggested based on the resident fuel prices.

Excluded:

- purchase of fuel by **individuals** in Hungary or abroad
- fuel purchase by residents in Hungary,
- value of fuel served by **Hungarian fuel companies to non-resident airlines** (general merchandise).

International transportation services are detailed as follows:

Modes of transport: sea, air, space, rail, road, inland waterway, pipeline transportation, electricity transmission and other supporting and auxiliary transport services.

1. Passenger transportation (EBOPS-codes by modes of transport: 207, 211, 220, 224, 228)

Services provided between the compiling economy and abroad or between two foreign economies in the international transportation of non-residents by resident carriers (credit) and that of residents by non-resident carriers (debit). Taxes and duties are included. For example:

- fares that are a part of package tours
 - charges for excess baggage, vehicles, or other personal accompanying effects
 - expenditures of food, drink, or other items that passengers make while on board carriers
 - charges paid by carrier for travel agencies and other booking services
 - rentals provided by residents to non-residents, and vice versa, of vessels, aircraft, coaches or other commercial vehicles with crew for limited periods (such as a single voyage) for the carriage of passengers
- See each EBOPS for more detailed information

We suppose that in Hungary only residents buy tickets and abroad only non-residents.

2. Freight transportation (EBOPS-codes: 208, 212, 221, 225, 229)

International transportation of the compiling economy's exports and imports of goods; rentals provided by residents to nonresidents, and vice versa, of vessels, aircraft, freight cars or other commercial vehicles with crews for limited periods (such as a single voyage) for the carriage of freight. Also included are towing related to the transportation of drilling platforms, floating cranes and dredges.

Carriers and forwarders possessing vehicle should report services supplied to non-residents and acquired from residents in the proper mode of transportation category.

If a **resident enterprise not pertaining to the transportation sector** charges directly a non-resident carrier, or supplies carrier service to a non-resident, or invoices the transportation costs to a non-resident consigner, it should be reported as **freight transportation in the appropriate mode of transportation category**.

3. Supporting and auxiliary transportation services (forwarding, other) (EBOPS-codes: 209, 213, 222, 226, 230)

Separately invoiced auxiliary logistics, forwarding and other services if they can be classified into any modes of transport.

270 Merchancing

Merchancing is a trilateral transaction, which is defined as the purchase of a good by a resident (of the compiling economy) from a non-resident and then the subsequent resale of the good to another non-resident. Direct and indirect merchancing can be distinguished.

- **Indirect merchancing:** goods are shipped without crossing Hungarian territory between two member states or between a member state and a non-EU country or between two non-EU countries. Also if the purchase and sale occurs in the same country.
- **Direct merchancing:** goods are crossing also the Hungarian borders. Two cases are known:
 - **goods enter Hungary only as a transit**, i.e. goods stop only because of repacking, loading, unloading, etc.
 - **goods are stored in Hungary:**
 - o **Included:**
 - goods are imported from a non-EU country, or from a community customs warehouse, stored in Hungary, and then shipped to a member state or to a non-EU country;
 - o **Excluded:**
 - goods are imported from a member state, stored (not in customs warehouse), and then shipped to another member state (the transaction is observed in the *foreign trade in goods statistics*);

- goods are imported from a non-EU country, stored (not in customs warehouse) and released to free circulation, then exported to a member state (the transaction is observed in the *foreign trade in goods statistics*);
- goods are imported from a member state, stored (not in customs warehouse), then exported to a non-member state (the transaction is observed in the *foreign trade in goods statistics*).

The purchase value and the corresponding costs (transportation, warehousing costs) should be reported on the *import sheets* of the questionnaire, whereas the value of resale (invoiced towards the buyer, VAT excluded) should be reported on the *export sheets*.

If the purchase and resale did not occur in the same statistical reference period, the transaction is only due when the resale (export) is finished.

If an exact breakdown on the imports meets difficulties, an estimation by the provider is suggested.

If the merchandising happens to be **unprofitable** (the value of imports exceed the value of imports), an explanation is needed in the „notes“ section of the questionnaire.

Other services related to merchandising (licences, transports) should be reported in the corresponding services category.

271 Other trade-related services
