

14. Work organisation and working time arrangements

A supplementary survey titled "Work organisation and working time arrangements" was linked to the labour force survey Q2 2019, which referred to the population aged 15–74 years with job. The supplementary questionnaire was issued to households in the selected sample of the labour force survey, at the same time as the basic survey was made. In the labour force survey, 2% of the people aged 15–74 years answering the basic survey did not answer the supplementary survey Q2 2019.

40.2 % of answered interviews were made by interviewing a third person, i.e. another member of the family. The rate of 'proxy interviews' was very high, 47.0% among men, while the value of the indicator reached 32.1% for women.

Due to weighing and adding up, there may be slight differences in the same aggregates of published absolute numbers.

If a variable (after grossing up) involves an occurrence of 2 500 to 4 999 persons, the data are to be regarded with reservation only because due to the high sampling error they may be incorrect; in case of an occurrence of fewer than 2 500 persons, the data are not usable.
