

Disadvantaged groups on the labour market

A supplementary survey called "Disadvantaged groups on the labour market" was linked to the Labour Force Survey, Q1 2015 which was carried out on the selected sample of households of the basic survey at the same time.

The information gained from the ad hoc module is used mainly as a supplement for the labour market characteristics data, collected in the Labour Force Survey. The 'people with disability' definition is based on self-classification, due to conceptual differences, the comparability with administrative data sources is limited.

Those are classified as 'people with disability' who have long-term (existing for at least 6 months) health problems, diseases or certain skills, activities cause long-term (lasting for at least 6 months) problems and are limited in work related activities.

1.8% of the respondents aged 19-64 who answered the basic survey did not answer the supplementary survey Q1 2015.

The performance rate of the supplementary survey "Disadvantaged groups on the labour market", Q1 2015

Denomination	It concerns the respondent			Performance rate
	and was answered	but wasn't answered	total	
	persons			%
Total	6 038 498	108 193	6 146 691	98.2
Gender

unemployed	214 529	123 264	337 793	36.5
economically inactive	1 094 985	594 025	1 689 010	35.2

There may be some difference between the same aggregates of the published absolute numbers due to the weighting and summing up. The evaluation of the distribution ratios was happened electronically - without individual correction, so the sum of partial data is not always equal to the displayed rounded value of the aggregated data.

The following **questions** of the questionnaire were linked to the part "people with disability".

The weighted data and sample size of the supplementary survey "Disadvantaged groups on the labour market", Q1 2015

Denomination	Male		Female		Total
