

Notification of balance and debt of the general government sector (second EDP notification in 2018)

The deficit of the general government sector was HUF 849.2 billion in 2017, 2.2% of GDP, based on second preliminary data of national accounts. According to data produced in compliance with the methodological requirements of the system of national accounts (ESA 2010) revenue of the general government sector was HUF 17,140.6 billion and its expenditure HUF 17,989.7 billion. Compared to 2016 revenues increased by 7.0% and expenditures by 8.4%.

The debt of the general government sector – based on data of the National Bank of Hungary – was HUF 28,095 billion, 73.3% of GDP at the end of 2017. Deficit and debt data correspond with those issued in the first release published on 2 October 2018.

HCSO reported the data to Eurostat, the Statistical Office of the EU, in compliance with the Regulation on the excessive deficit procedure (EDP), according to the methodological requirements of the European System of Accounts (ESA 2010).

Eurostat continues to express a reservation regarding the sectoral classification of the National Bank of Hungary's foundations. Eurostat considers that these foundations, including their subsidiaries, should be

classified into the general government sector. This would increase the deficit of the general government sector by HUF 25.3 billion for 2015 (0.07% of GDP), by HUF 54 billion for 2016 (0.15% of GDP) and by HUF 33.7 billion (0.09% of GDP) for 2017. The level of debt would stay unchanged all these years.
