

# INTERNET SERVICES, 2ND QUARTER OF 2025

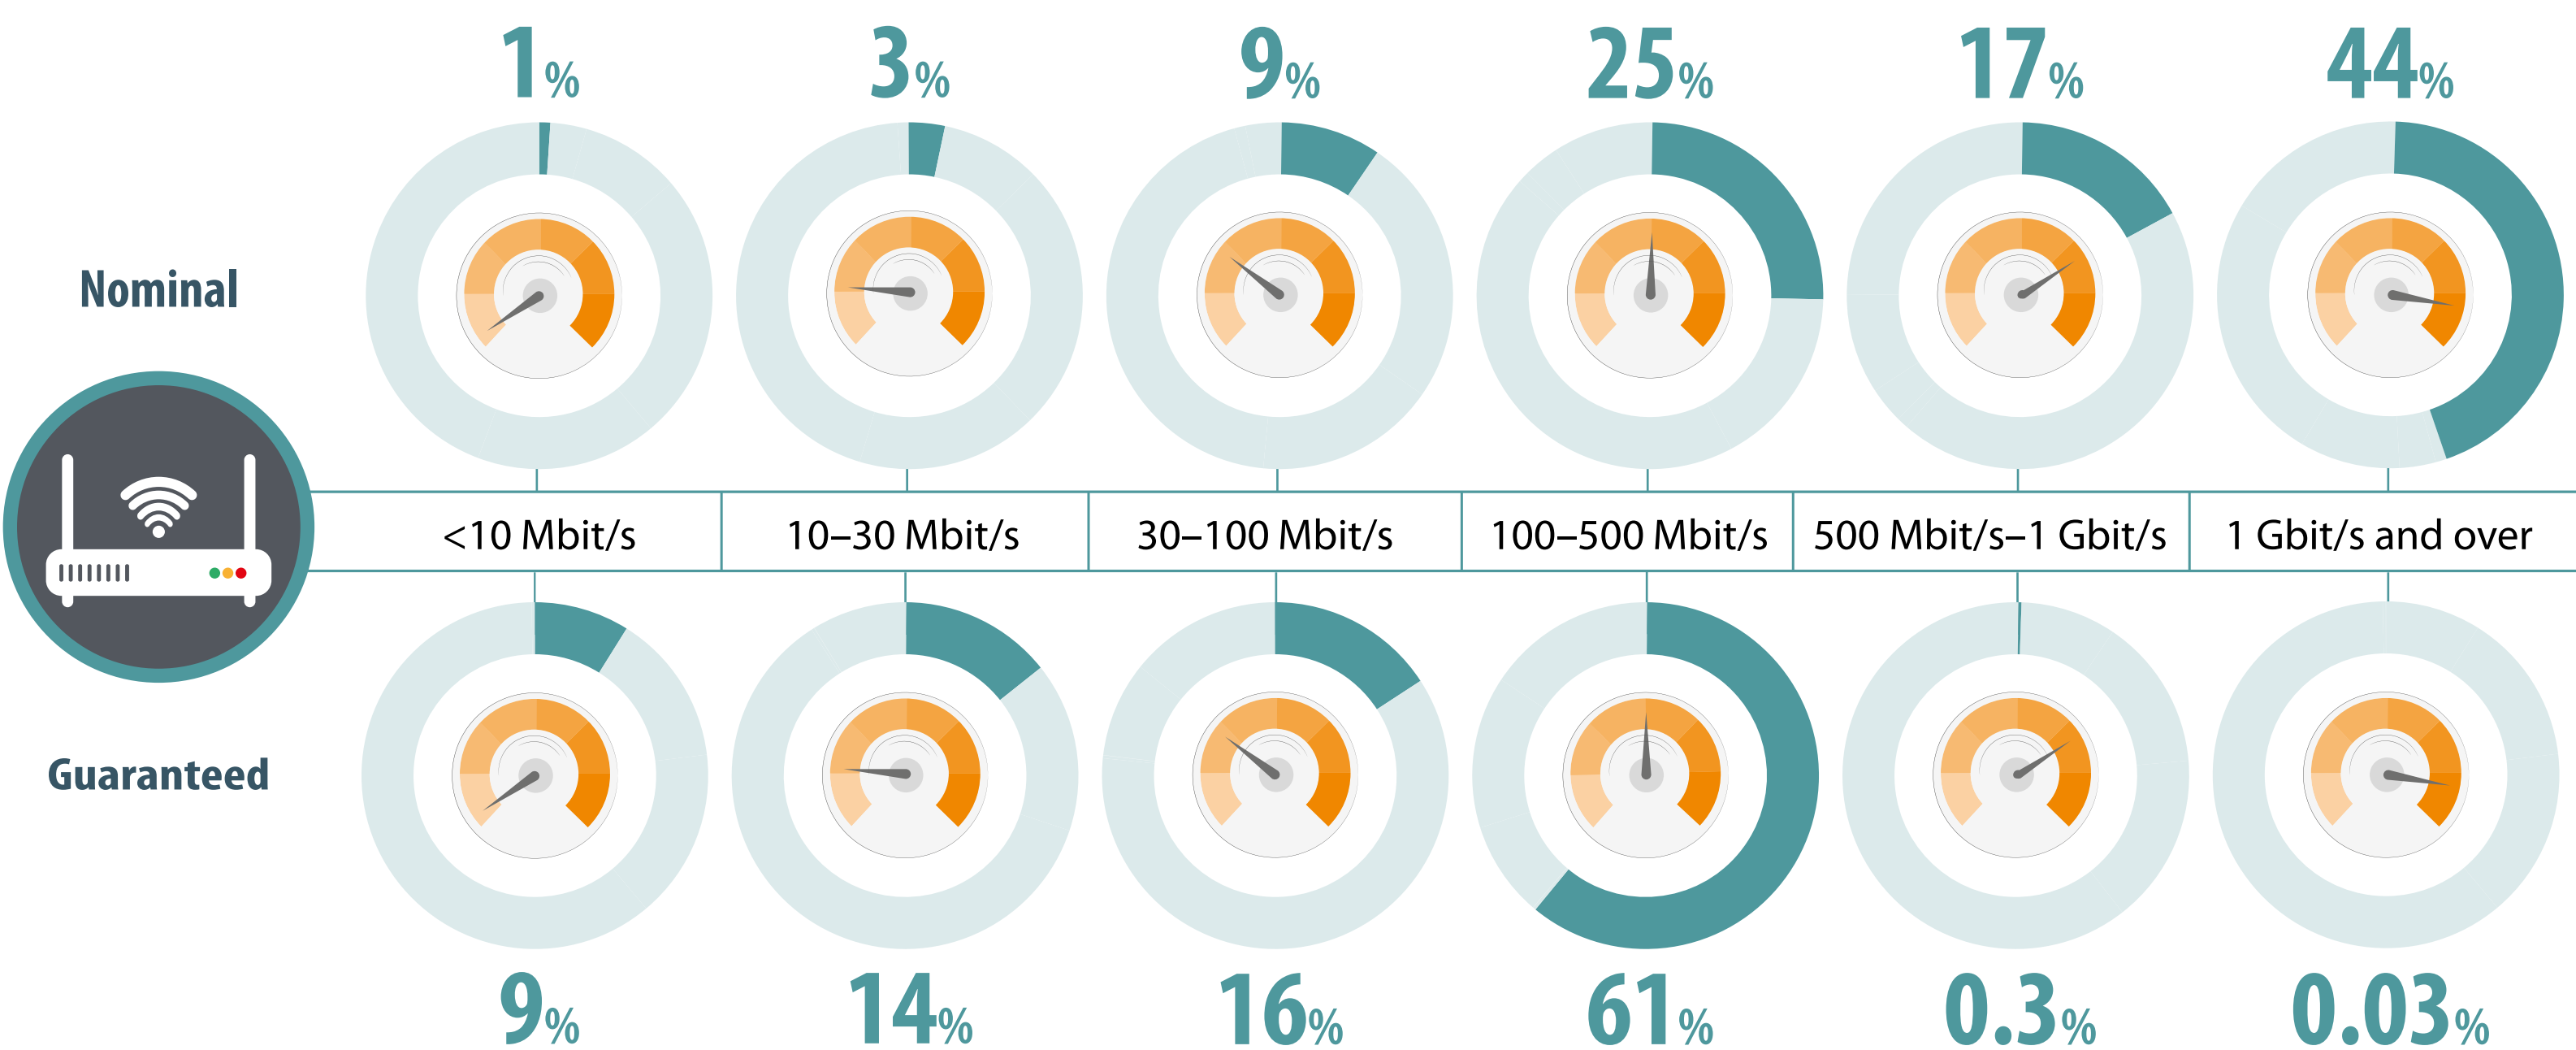

The number of fixed line internet subscriptions surpassed in the 2nd quarter of 2025 by 2.9% the one year earlier level, due to the 9.8% increase of the optical segment.

## Change of the optical segment within the fixed-line internet subscriptions, thousand

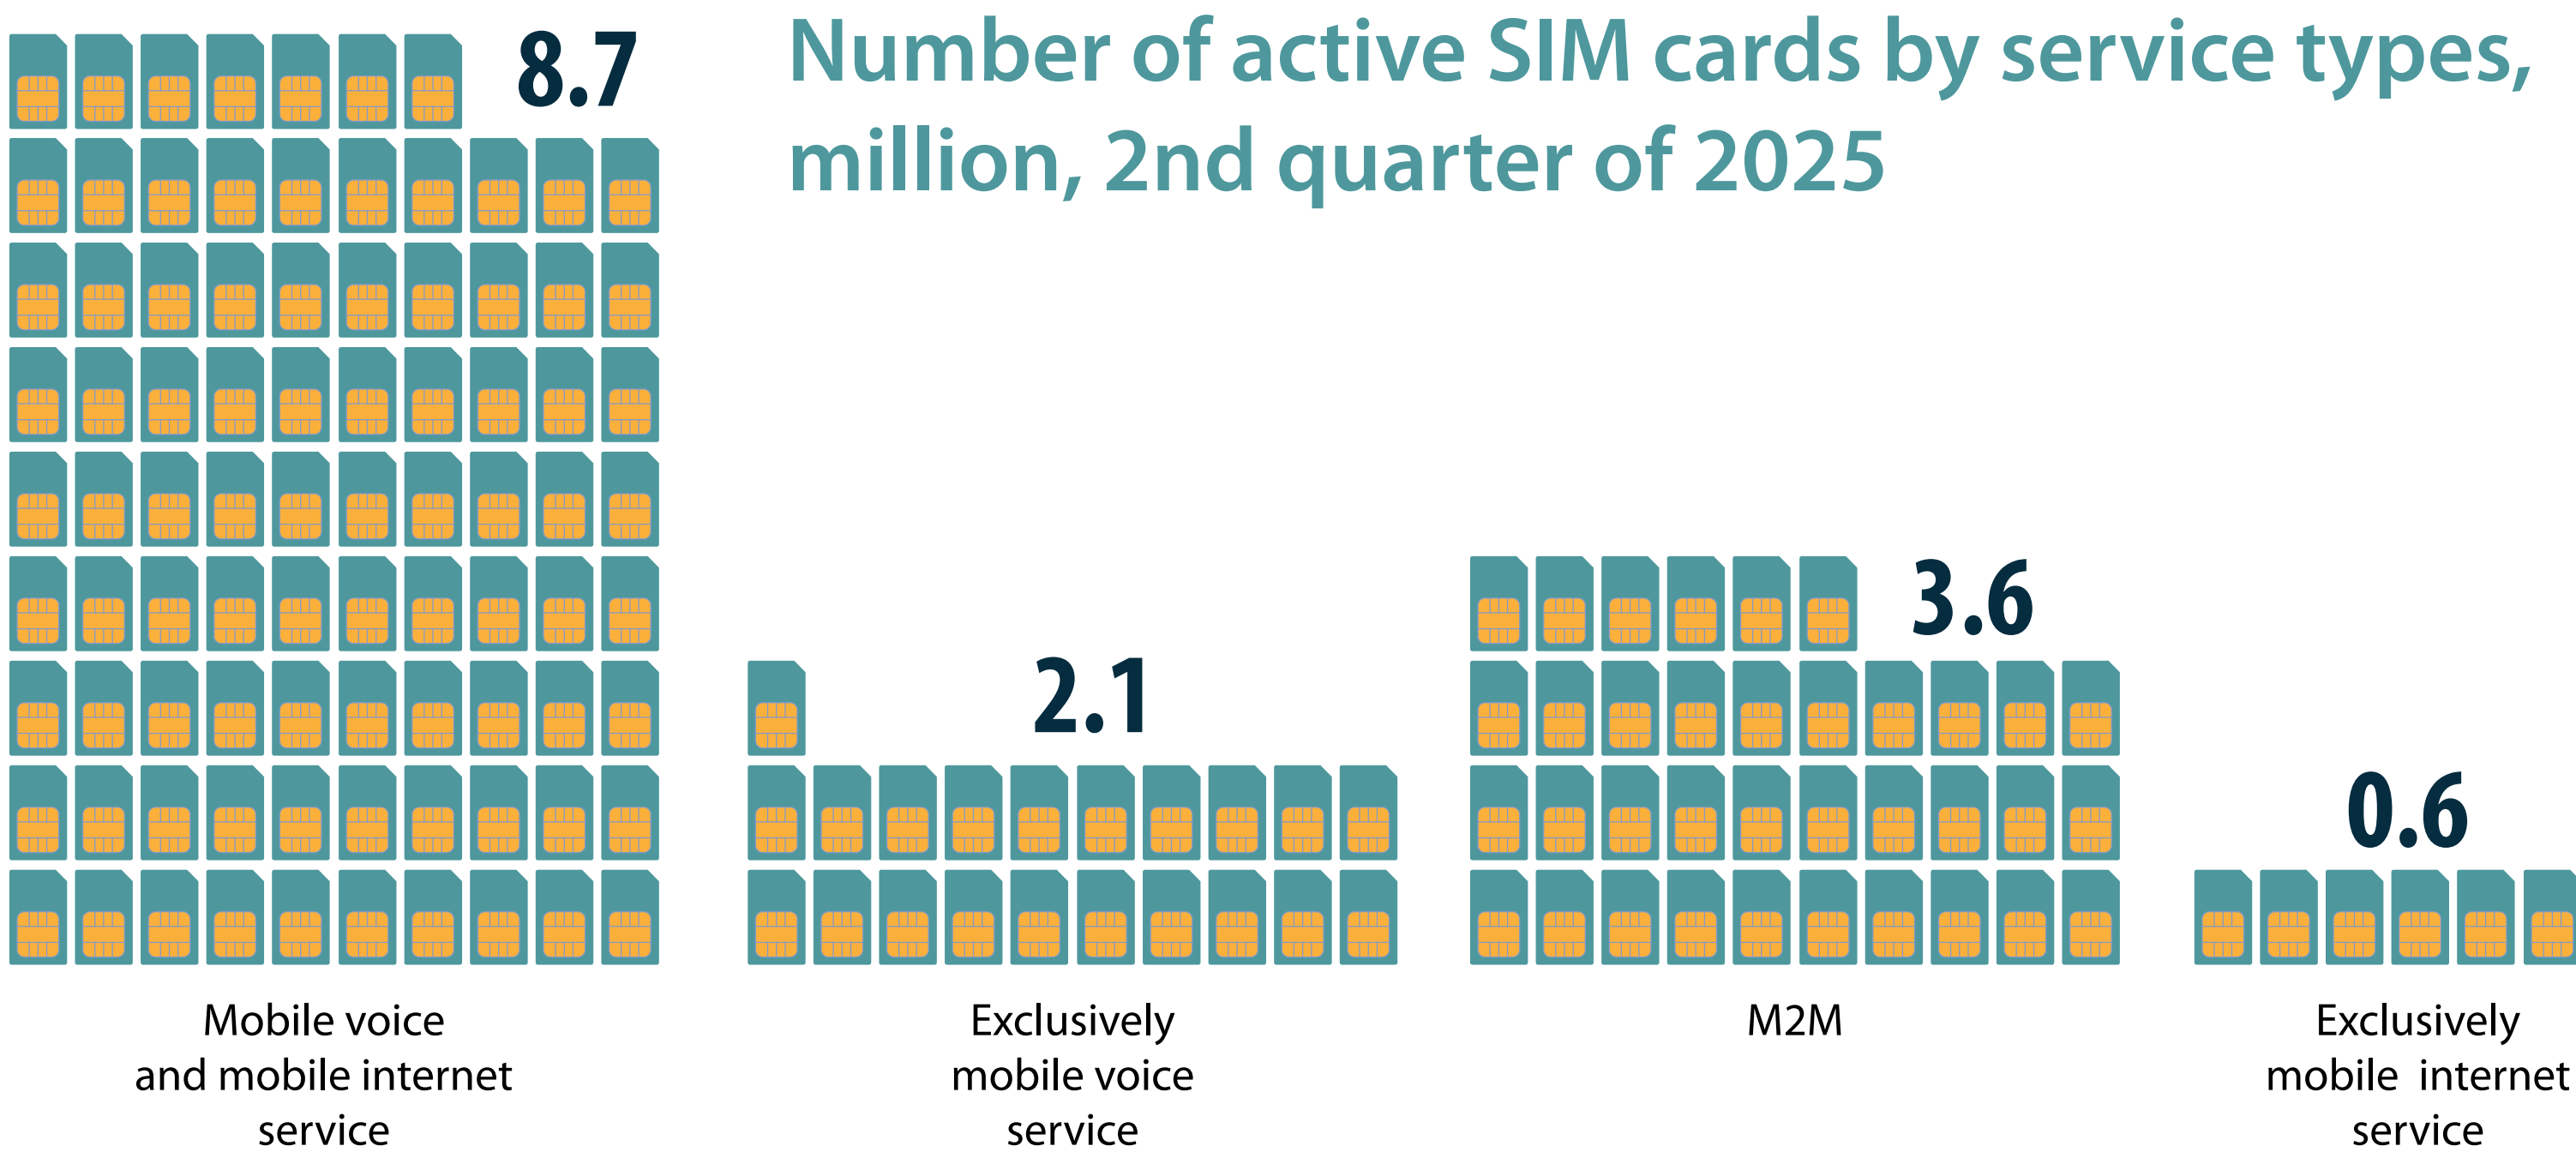

More and more subscribers prefer the high-speed internet (at least 500 Mbit/s) offering subscription packages.

## Distribution of fixed-line internet subscriptions by guaranteed and nominal bandwidth, 2nd quarter of 2025

The number of SIM cards for mobile internet grew by 4.9% year-on-year, first of all due to the spread of M2M (machine to machine communication) cards.

Mobile data traffic grew in one year by close to one-fifth. Approximately 37 Gbyte data traffic came by one mobile subscription with internet access. Download traffic through fixed internet increased by 21% previous year.

## Data traffic quarterly changes through fixed-line internet and mobile networks
