

INTERNET SERVICES, 3RD QUARTER OF 2025

The number of fixed line internet subscriptions surpassed in the 3rd quarter of 2025 by 1.0% the one year earlier level, due to the 6.6% increase of the optical segment.

Change of the optical segment within the fixed-line internet subscriptions, thousand

More and more subscribers prefer the high-speed internet (at least 500 Mbit/s) offering subscription packages.

Distribution of fixed-line internet subscriptions by guaranteed and nominal bandwidth, 3rd quarter of 2025

The number of SIM cards for mobile internet grew by 4.9% year-on-year, first of all due to the spread of M2M (machine to machine communication) cards.

Mobile data traffic grew in one year by close to one-fifth. Approximately on average 39 Gbyte data traffic in the 3rd quarter of 2025 came by one mobile subscription with internet access. Download traffic through fixed internet increased by 5.1% previous year.
